Office Action Summary

Art Unit: 3764

DETAILED ACTION

Specification

1. A substitute specification excluding claims is required pursuant to 37 CFR 1.125(a) because the original specification does not recite a detailed description for each figure shown in the drawings.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one

Art Unit: 3764

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It is not clear as to what each of the structural limitations are in the invention because the specification is incomplete.

4. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear as to what each of the structural limitation of are because the specification is incomplete.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-17 as understood are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kittelsen '832.

Art Unit: 3764

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Washburn, Kittelsen '301 and Adell, each discloses a mouthguard. Although each of these references discloses structural limitations recited in the claims, neither was used to reject any claims, in the first office action.
